

Global connectivity.
Business productivity.
Good things come
in small packages.

Aviator 200

Aviator 200

Global connectivity for light jets and turboprops

Compact and affordable
global connectivity.

ABOUT AVIATOR 200

A top solution for affordable global connectivity, SwiftBroadband is a satellite-based service that allows you to use your laptop, tablet or smartphone to securely log on to your corporate network, transfer data and send/receive email. With data rates several times faster than dial-up, it permits business flyers to do everything they do on the ground even as they're cruising miles above it. You can also use it to simply place phone calls.

The Aviator 200 makes SwiftBroadband service practical and affordable for smaller aircraft.

A COMPLETE AIRBORNE COMMUNICATIONS SOLUTION FOR SMALLER AIRCRAFT

- Service coverage in multiple regions around the world
- Lightweight, compact, and affordable
- Ideal for light jets and turboprop aircraft
- Send email and access the Internet using your laptop or smartphone
- Data rates up to 200 kbps
- High quality voice service using integrated corded or cordless cabin handsets
- Simultaneous voice and data
- Wired or wireless connections
- Available fully integrated with Gogo Biz[®] Inflight Internet Service
- Powered by the latest generation of Inmarsat satellites

Global connectivity for light jets and turboprops

FLEXIBLE DATA RATES. SUPERIOR VOICE QUALITY. NO COMPROMISES

Gogo Business Aviation's SwiftBroadband data rates are based purely on the number of Megabytes (MB's) transferred each month. With no locked pricing plans and no overage fees, you're simply billed for the amount of data you use each month - and the more you use, the less you pay per MB.

Should you use your system merely to place and receive phone calls, you are assured that the quality of voice transmission will be better than ever.
